PROJECT# 2

SEO BASICS AND KEYWORD RESEARCH

SUBMITTED BY

ARIBA YASIN

BATCH 2026

Introduction

Search Engine optimisation (SEO) is a digital marketing strategy that improves a website visibility on search engine like Google it helps websites rank higher for relevant searches and attract organic unpaid traffic.

Project Area

Search Engine Optimisation (SEO) and keyword Research.

Project Objectives

The purpose of this project is to conduct basic SEO key word research for Rahbar, an education and career counselling platform the research focuses on identifying development research terms used by potential customers analysing their search intent and recommend recommending suitable keywords for website pages and blog content.

It will help improve with organic search visibility attract website traffic and reach students' parents who are actively seeking education and career guidance.

Target Audience

⇒ Student

- Intermediate students exploring creature career options.
- Matric students deciding which field to enter.
- Students interested in career assessment and aptitude test.

⇒ Parents

- Parents seeking suitable career option for their children's.
- Parents involved in their children's education and degree selection.
- Parents concerned about their children's long-term career prospects.

Keyword Research

Keyword research helps Rahbar identify the terms and phrases target audience may use when searching for a career and education related information online

#	Keyword	Search Intent	Keyword Type
1	Career guidance for students	Informational	Broad

2	How to choose a right career?	Informational	Long tail
3	Career counselling for parents	Informational	Long tail
4	Career planning for students	Informational	Long tail
5	Career options after intermediate	Informational	Long tail
6	Career options after matric	Informational	Long tail
7	Online career counselling	Informational	Broad
8	Career counsellor in Pakistan	Transactional	Service
9	Online career counselling	Transactional	Service

Search Intent Analysis

○ Informational Intent

The user is looking for information guidance and answer to a question, for example “How to choose the right career”.

○ Transactional Intent

The user is interested in taking an action or using a service, for example “Online career counselling”.

○ Navigational Intent

The user is specifically trying to locate a particular brand or website, for example “Rahbar career counselling”.

Primary And Secondary Keywords

○ Primary Keywords

“Career guidance for students”

This can be considered by a primary keyword because it close reflects the platform core service and directly target its main audience.

○ **Secondary Keyword**

- Career planning for students
- Career counselling
- Aptitude test
- Career roadmap
- Future career opportunities

These secondary keywords can be incorporated naturally through website pages, blog, edits and supporting content

SEO Recommendation for Rahbar

- 1- Use relevant keywords in page titles, URLs and website content.
- 2- Made SEO friendly blocks around students and parents' questions.
- 3- Use longtail keywords such as career guidance for student students in Pakistan.
- 4- Include clear, CTAs such as the career assessment or book a counselling session.
- 5- Monitor SEO performance using tool such as Google search Console and Google analytics.

SEO Benefits for Rahbar

- 1- Increase organic source of visibility
- 2- Attract relevant students and parents
- 3- Generate targeted website traffic
- 4- Improve user engagements through relevant content
- 5- Generate potential counselling and assessment leads

Conclusion

Key word research is an essential component of Rahbar's digital marketing strategy as it helps the brand understand the search behaviour needs and intention of its target audience. By targeting relevant keywords and aligning them with appropriate search intent they can develop SEO focused website pages and valuable blog content. The strategy can improve for organic visibility, attract qualified traffic, established brand credibility, and support the conversation of website visitors into potential counselling users.
